Dear Sirs, I respectfully disagree with NAB's petition 04-160 and your current plan to block XM radio from broadcasting traffic/news. They are innovative and have filled a void that other have not. And you want to punish them for this? First of all, they have a right to broadcast anything that is not obscene. Second, you have no right to block them providing a service that we find valuable. I travel alot and now I know where to go to find instant traffic/weather reports where ever I am. Otherwise I have to spend hours hunting down the local station, which usually has limited inforamtion, at best, except during absolute prime driving time. I pay for this service and there should be no problem with them broadcasting it. Thank you for your time.
